

**HUDSON**  
DERMATOLOGY & LASER SURGERY

### **BIOPSY WOUND CARE INSTRUCTIONS**

- \* Keep the biopsy area dry and covered until tomorrow
- \* Tomorrow:
  - please remove the original bandage
  - gently cleanse the area with mild soap and water
  - apply a small amount of Vaseline or Aquaphor to the biopsy site
  - cover with a Band-Aid (if you have a sensitivity to bandages, a hypoallergenic brand we recommend is Nexcare Sensitive Skin)
- \* Please continue this wound care daily until the wound is healed or stitches are removed.
- \* If you have stitches, please avoid exercising until they are removed.

Note: If the area becomes painful, increasingly red or swollen, or there is a noticeable amount of discharge, please don't hesitate to contact us at:
